

This gel depicts the NEB 1kb ladder and a digestion of the plasmid 11644 with the following enzymes: FspI single digest, MscI single digest, FspI + MscI double digest

Plasmid 11644
pLVET-tTR-KRAB

DNA digested with FspI single digest, MscI single digest, FspI +MscI double digest overnight

Gel: 0.8% TAE stained with 100 ml 1X TAE and 5uL of ethidium bromide

Ran for 6 hours at 47 volts
