

This gel depicts the NEB 1kb ladder and a digestion of the plasmid **pLVET-tTR-KRAB** with the following enzymes: **BamH I, EcoR I** (each a single digest)

11644
pLVET-tTR-KRAB

DNA digested with **each enzyme** for **1** hour
Gel: 0.8% TAE stained with 100 ml 1X TAE and 5uL of ethidium bromide
Ran for **1.5** hours at **100** volts
