

This gel depicts the NEB extended1kb ladder and a digestion of the plasmid pHaMDRwt with the following enzymes: XhoI, HindIII-HF, and EcoRI-HF.

Plasmid 10957:
pHaMDRwt

DNA digested with XhoI, HindIII-HF, and EcoRI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
