

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pcDNA4 myc PGC-1 alpha with the following enzymes: XhoI and BamHI-HF.

**Plasmid 10974:**  
pcDNA4 myc PGC-1 alpha

DNA digested with XhoI single digest and XhoI/ BamHI-HF double digest for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
