

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pAAV.CAG.LSL.tdTomato with the following enzymes: BsrGI-HF and BamHI-HF.

Plasmid 100048:
pAAV.CAG.LSL.tdTomato

DNA digested with BsrGI-HF single digest and BsrGI-HF/ BamHI-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
