

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pLKO.1P shSOD1 with the following enzymes: EcoRI-HF and NcoI-HF.

Plasmid 102975:
pLKO.1P shSOD1

DNA digested with EcoRI-HF and NcoI-HF double digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
