

This gel depicts the NEB 1kb ladder and a digestion of the plasmid LSB-hsa-miR-633 with the following enzymes: NcoI-HF.

Plasmid 103691:
LSB-hsa-miR-633

DNA digested with NcoI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
