

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pFA6a-tdTomato-hphMX6 with the following enzymes: PacI and MluI-HF.

Plasmid 105157:
pFA6a-tdTomato-hphMX6

DNA digested with PacI and MluI-HF single digests and PacI/ MluI-HF double digest for **2 hours.**

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.75 hours at 100 volts.
