

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pUA66 PcspA GFP No Linker with the following enzymes: SacI-HF.

Plasmid 105605:
pUA66 PcspA GFP No Linker

DNA digested with SacI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1 hours at 100 volts.
