

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pHC01 with the following enzyme: AflII.

**Plasmid 106900:**  
pHC01

DNA digested with an AflII single digest for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
