

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pUNO mouse CD274 + 3'UTR WT full length with the following enzymes: Agel-HF.

Plasmid 107012:
pUNO mouse CD274 + 3'UTR WT full
length

DNA digested with Agel-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
