

This gel depicts the NEB 1kb ladder and a digestion of the plasmid C1(1-29)-TurboID-V5_pLX304 with the following enzymes: AgeI-HF.

Plasmid 107175:
C1(1-29)-TurboID-V5_pLX304

DNA digested with AgeI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
