

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pAAV2-SBECN1W with the following enzymes: SmaI.

Plasmid 107937:
pAAV2-SBECN1W

DNA digested with SmaI single digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
