

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid RCH1:HDT1,HDT2-RNAi with the following enzymes: KpnI-HF.

Plasmid 108446:
RCH1:HDT1,HDT2-RNAi

DNA digested with KpnI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
