

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pcDNA3-HA-eEF2K with the following enzymes: BamHI-HF and XhoI.

Plasmid 110160:
pcDNA3-HA-eEF2K

DNA digested with BamHI-HF single digest and BamHI-HF/ XhoI double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
