

This gel depicts the NEB 1kb ladder and a digestion of the plasmid Human USP30 (1-517, WT, MG-38-11) with the following enzyme: EagI-HF.

**Plasmid 110748:**  
Human USP30 (1-517, WT, MG-38-11)

DNA digested with a EagI-HF single digest for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
