

This gel depicts the NEB 1kb ladder and a digestion of the plasmid dCas9-KRAB with the following enzymes: NdeI and EcoRI-HF.

Plasmid 110820:
dCas9-KRAB

DNA digested with NdeI and EcoRI-HF single digests and NdeI/EcoRI-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
