

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pAV hH1-ARRET with the following enzymes: BstZ171-HF and PacI.

Plasmid 111374:
pAV hH1-ARRET

DNA digested with Bstz171-HF/ PacI double digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
