

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid pV1524 with the following enzymes: PstI-HF.

Plasmid 111431:
pV1524

DNA digested with PstI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
