

This gel depicts the NEB 1kb Ladder and a digestion of the plasmid pMIH-TOMM20-Halo with the following enzymes: BamHI-HF and XhoI

Plasmid 111626:
pMIH-TOMM20-Halo

DNA digested with BamHI-HF and XhoI double digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
