

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pAdDeltaF6 with the following enzymes: EcoRI-HF and Nde I

**Plasmid 112867:**  
**pAdDeltaF6**

DNA digested with EcoRI-HF and Nde I double digests for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
