

This gel depicts the NEB 1kb ladder and a digestion of the plasmid retro-gRNA-mRFP1 with the following enzymes: EcoRI-HF and HindIII-HF.

Plasmid 112914:
retro-gRNA-mRFP1

DNA digested with EcoRI-HF single digest and EcoRI-HF/ HindIII-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
