

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pHR CD19-empty CAR with the following enzymes: NotI-HF and Agel-HF.

**Plasmid 113015:**  
pHR CD19-empty CAR

DNA digested with NotI-HF single digests and NotI-HF/ Agel-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
