

This gel depicts the NEB 1kb ladder and a digestion of the plasmid YIplac211-vps10-104 with the following enzymes: PstI-HF.

**Plasmid 115426:**  
YIplac211-vps10-104

DNA digested with PstI-HF single digest for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
