

This gel depicts the NEB 1kb Ladder and a digestion of the plasmid pMRE130 with the following enzymes: PvuI-HF, SacI-HF

**Plasmid 118484:**  
pMRE130

DNA digested with PvuI-HF and SacI-HF double digest for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
