

This gel depicts the NEB 1kb ladder and a digestion of the plasmid AAV SYN PSAM4 GlyR IRES EGFP with the following enzymes: Agel-HF and SmaI.

**Plasmid 119742:**  
AAV SYN PSAM4 GlyR IRES EGFP

DNA digested with Agel-HF and SmaI single digests for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
