

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pMK394 (mAID-Nluc-Neo) with the following enzymes: PvuI-HF.

Plasmid 121195:
pMK394 (mAID-Nluc-Neo)

DNA digested with PvuI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
