

This gel depicts the NEB 1kb Ladder and a digestion of the plasmid hFerritinH with the following enzymes: EcoRI-HF

**Plasmid 122652:**  
hFerritinH

DNA digested with EcoRI-HF single digest for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
