

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pre_IV_CS10_1545_v1 with the following enzymes: EcoRI-HF and AatII.

Plasmid 126861:
pre_IV_CS10_1545_v1

DNA digested with EcoRI-HF single digest and EcoRI-HF/ AatII double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
