

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pR26-CMVconst with the following enzymes: NheI-HF.

**Plasmid 127373:**  
pR26-CMVconst

DNA digested with NheI-HF single digest for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
