

This gel depicts the NEB 1kb ladder and a digestion of the plasmid TBP6.7 non-targeting gRNA lambda phage with the following enzymes: Scal-HF and KpnI-HF.

Plasmid 132547:
TBP6.7 non-targeting gRNA lambda phage

DNA digested with a Scal-HF single digest and a Scal-HF/KpnI-HF double digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
