

This gel depicts the NEB 1kb ladder and a digestion of the plasmid S1m tagged DANCR with the following enzymes: KpnI-HF, EcoRI-HF, and BamHI-HF.

Plasmid 138585:
S1m tagged DANCR

DNA digested with KpnI-HF and EcoRI-HF double digest and BamHI-HF single digest for **2 hours**.

Gel: 0.8% agarose stained with 5 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
