

This gel depicts the NEB 1kb ladder and a digestion of the plasmid SG3 Δ ENV RT D185A with the following enzymes: EcoRI-HF and SpeI-HF

Plasmid 145782:
SG3 Δ ENV RT D185A

DNA digested with EcoRI-HF single digest and EcoRI-HF, SpeI-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 5 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
