

This gel depicts the NEB 1kb ladder and a digestion of the plasmid lenti-25xUPRE-minP-EGFP with the following enzymes: NheI-HF and AgeI-HF.

Plasmid 159668:
lenti-25xUPRE-minP-EGFP

DNA digested with NheI-HF and AgeI-HF double digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
