

This gel depicts the NEB 1kb ladder and a digestion of the plasmid VL3 (Flag-Mad2) with the following enzymes: BamHI-HF and HindIII-HF.

Plasmid 16047:
VL3 (Flag-Mad2)

DNA digested with BamHI-HF single digest and BamHI-HF/ HindIII-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
