

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pCMV-Neo-Bam p53 wt with the following enzyme: BamHI-HF.

Plasmid 16434:
pCMV-Neo-Bam p53 wt

DNA digested with BamHI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 2 hours at 80 volts.
