

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pBI-MCS-EGFP with the following enzymes: Stu I and HindIII-HF.

Plasmid 145782:
pBI-MCS-EGFP

DNA digested with Stu I single digest and Stu I, HindIII-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 5 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
