

This gel depicts the NEB 1kb Ladder and a digestion of the plasmid CAG-GFP with the following enzymes: KpnI-HF and NheI-HF

**Plasmid 16664**  
**CAG-GFP**

DNA digested with KpnI-HF and NheI-HF single digests for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
