

This gel depicts the NEB 1kb Ladder and a digestion of the plasmid pEG BacMam C term 3C eGFP His8 with the following enzymes: EcoRI-HF, PvuI-HF

Plasmid 160687:
pEG BacMam C term 3C eGFP His8

DNA digested with EcoRI-HF/PvuI-HF double digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
