

This gel depicts the NEB 1kb ladder and a digestion of the plasmid CMV-CRY2oligo-mcherry-ANXA11(R346C) with the following enzymes: AflIII.

Plasmid 164206:
CMV-CRY2oligo-mcherry-
ANXA11(R346C)

DNA digested with AflIII single digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
