

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pCMV-CreEGFP with the following enzyme(s): Sma I and Nde I.

**Plasmid 165140:**  
**pCMV-CreEGFP**

DNA digested with a Sma I single digest and a Sma I/Nde I double digest for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of SYBR Safe.  
Ran for 1.5 hours at 100 volts.
