

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid pMMB206-CT61 with the following enzymes: EcoRI-HF and SpeI-HF.

**Plasmid 165410:**  
pMMB206-CT61

DNA digested with EcoRI-Hf and SpeI-HF double digest for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
