

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pLenti CMV GFP Blast (659-1) with the following enzymes: BamHI-HF.

Plasmid 17445:
pLenti CMV GFP Blast (659-1)

DNA digested with BamHI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
