

This gel depicts the NEB 1kb ladder and a digestion of the plasmid EF.CMV.RFP with the following enzymes: EcoRI-HF and EcoRV-HF.

Plasmid 17619:
EF.CMV.RFP

DNA digested with EcoRI-HF and EcoRV-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 2.5 hours at 60 volts.
