

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pgk-ATG-frt with the following enzymes: EcoRI HF

Plasmid 20734
pgk-ATG-frt

DNA digested with EcoRI HF single digest for **2 hours**

Gel: 0.8% TAE stained with 100 ml 1X TAE and 5uL of ethidium bromide

Ran for 2 hours at **46 volts**
