

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pgk-ATG-frt with the following enzymes: EcoRV-HF and Apal.

Plasmid 20734:
pgk-ATG-frt

DNA digested with EcoRV-HF single digest and EcoRV-HF/ Apal double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
