

This gel depicts the NEB 1kb ladder and a digestion of the plasmid PB-CA-rtTA Adv with the following enzymes: NcoI-HF and SmaI.

**Plasmid 20910:**  
PB-CA-rtTA Adv

DNA digested with NcoI-HF and SmaI single digests and NcoI-HF/ SmaI double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
