

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid pEP4 E02S EM2K with the following enzymes: BamHI-HF and Scal-HF.

**Plasmid 20923:**  
pEP4 E02S EM2K

DNA digested with BamHI-HF/ Scal-HF double digest for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
