

This gel depicts the NEB 1kb ladder and a digestion of the plasmid 7TFP with the following enzymes: EcoRI-HF and PstI-HF.

**Plasmid 24308:
7TFP**

DNA digested with EcoRI-HF and PstI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
