

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pLenti CMVtight Puro DEST (w768-1) with the following enzymes: XhoI and Sall-HF.

**Plasmid 24630:**  
pLenti CMVtight Puro DEST (w768-1)

DNA digested with XhoI and Sall-HF single digests for **2 hours**.  
Gel: 0.8% agarose stained with 3 uL of ethidium bromide.  
Ran for 2 hours at 60 volts.
